

Press Release

SHS Viveon and Bisnode D&B Switzerland partner to simplify compliance and risk management for enterprises

Joint solution of both industry experts enables fully digital and globally consistent compliance checks, seamlessly integrated into existing business processes

Munich/Zurich March 22, 2021 - SHS Viveon AG (m:access ISIN DE000A0XFWK2 / WKN A0XFWK), the modular platform for the automation of risk, credit and compliance processes, and Bisnode D&B Switzerland, the world's leading provider of data and analytics for business decision-making, have entered into a partnership. The agreement aims to leverage synergies of both companies in a new joint compliance and risk management solution. The solution specifically benefits international enterprises in the consumer goods, pharmaceutical and healthcare, as well as industrial and retail sector.

The new solution from Bisnode D&B Switzerland and SHS Viveon will help companies incorporate relevant data for risk and compliance checks into their existing processes. "Especially when onboarding new suppliers, collecting and integrating such data can take quite some time and effort," explains Ralph Schuler, CEO of SHS Viveon AG. Macario Juan, Managing Director Bisnode D&B Schweiz AG adds: "Only with an up-to-date, fully digital solution, based on suitable B2B data, potential risks from new business partners can be minimized and the overall basis for decision-making significantly improved."

Combination of global data with a fully digital platform

The new solution from SHS Viveon and Bisnode provides its users with high-quality data for individual risk assessments. The partnership between the two industry experts combines Bisnode's global B2B financial data with SHS Viveon's flexible and easy-to-use risk and compliance platform. This allows compliance checks to be fully digital and seamlessly integrated into existing business processes.

"Our one-stop-shop approach simplifies processes considerably and keeps the effort extremely low," says Christin Schmidt, Senior Compliance Consultant Bisnode D&B Schweiz AG. "After a simple request and the detailed, fully automated data analysis, users only ever receive a notification if there is actually an analysis point they need to look at more closely. This makes risk and compliance management much faster and more targeted."
